NEW SERVICE FEES & REQUIREMENTS

Mims WSC charges a base fee of \$1,700.00 for installation of a new standard water service. This fee applies to all properties within the Mims WSC service area that have an active water line adjacent to the property. The base fee consists of the following: \$100.00 Membership, \$700.00 Service Tap Fee, and \$900.00 Equity Buy-In Fee. The Corporation is stock owned, and the equity buy-in fee is charged in order to make each new customer equivalent to the existing customers.

Anytime a line extension or road bore in necessary to provide service to a property; it is considered a non-standard service. There will be fees charged in addition to the base fee to provide service in these circumstances. The fees are assessed on a per service basis that will be quoted by the contractor. These quotes will be obtained following the service application and will be provided in writing as soon as calculated, after receipt of application.

Restoration of service to a pre-existing service site is \$350.00 for a standard residential metered service, which includes installation of a water meter and the \$100.00 membership. Restoration of larger metered services is quoted on a per-case basis.

After total fees are assessed and the application is approved and accepted by the Corporation, the service will be installed on the first available date of our contractor. Once a new water service is installed, the customer will begin receiving a monthly water bill, whether there has been water usage or not. Our minimum billing for the standard residential metered service is \$32.16 per month, and the water usage is billed at \$8.50 per thousand (1000), billed in addition to the minimum billing. Larger metered services are billed at different minimums, depending on the size of the meter, with the same cost of water usage applied.
